Environmental Policy

Glomma Papp AS is committed to promoting sustainability and protecting the environment. We recognize the importance of safeguarding our planet and are dedicated to minimizing our environmental impact. Our environmental policy is guided by a set of key performance indicators that reflect our commitment to sustainable practices and continuous improvement.

Our goals focus on areas such as compliance with environmental laws and regulations, pollution prevention, resource conservation, climate action, sustainable practices, and continuous improvement. We have set targets to ensure we contribute our part to addressing environmental challenges. Our environmental policy is based on the following principles:

Objectives

What	How	Goal
Climate action (1) (short term)	We work to prevent pollution by reducing or eliminating waste and emissions.	Our goal is to reduce our greenhouse gas emissions by 20% by 2030, compared to 2022 emissions/produced ton. By 2050, the goal is to reduce by about 40% compared to 2022 level/produced ton.
Climate action (2)	We strive to minimize energy consumption throughout the company by investing in new machinery, promoting renewable energy, and investing in new and better heat recovery for buildings.	Our goal is to reduce the total energy demand across the company by 10% by 2030 compared to 2022 levels/produced ton. By 2050, the goal is to reduce by 25% compared to 2022 levels/produced ton.
Sustainable practices	We work with sustainable practices in all our operations, including purchasing environmentally friendly products and using recycled materials.	Our goal for sustainable practices is to ensure that at least 30% of our suppliers meet our sustainability criteria by 2025. The long-term goal is that at least 80% of our suppliers meet our sustainability criteria by 2050.

We communicate this policy to all employees, stakeholders, and the public, ensuring that all employees are trained to follow our environmental policy. We will regularly review and update our policy to ensure it remains relevant and effective.

Sarpsborg 2024
