# Procurement Policy

Glomma Papp AS is committed to procurement practices that promote social, environmental, and economic sustainability. We believe that sustainable procurement is essential to achieving our goals and contributing to a more sustainable world.

## Principles

Our procurement policy is based on the following principles:

1. Compliance: We comply with all applicable laws, regulations, and international conventions related to sustainable procurement, including the UN Global Compact, the International Labour Organization (ILO) conventions, the Paris Agreement, and the UN Sustainable Development Goals (SDG).
2. Social Responsibility: We strive to ensure that our procurement practices promote social responsibility, including fair labour practices, respect for human rights, and diversity and inclusion. We work with our suppliers to ensure their labour practices align with international conventions and our ethical standards, and we prioritize suppliers who demonstrate a commitment to social responsibility.
3. Environmental Responsibility: We seek to minimize the environmental impact of our procurement practices by promoting the use of environmentally friendly products and services, reducing waste and emissions, and promoting the principles of the circular economy. We consider the entire lifecycle of products and services from raw material extraction to disposal, and we prioritize suppliers who demonstrate a commitment to environmental sustainability.
4. Economic Responsibility: We promote economic sustainability by supporting local suppliers wherever possible and encouraging business practices that contribute to the long-term economic health of the communities in which we operate.
5. Transparency and Accountability: We are committed to transparency and accountability in our procurement practices, including regular reporting on our sustainable procurement performance and collaborating with suppliers to promote sustainable practices throughout the supply chain. We communicate our expectations and requirements for sustainability to our suppliers and work with them to develop action plans and monitor their progress.

To ensure the successful implementation of our procurement policy, we have:

1. Developed and communicated our policy to all stakeholders, including suppliers and relevant employees.
2. Ensured that all employees involved in procurement receive training in sustainable procurement practices. We provide regular training and resources to our procurement team and incorporate sustainability into our procurement processes and decision-making.
3. Collaborated with our suppliers to promote sustainable practices and support their development of sustainable products and services. We engage our suppliers in dialogue on sustainability and support them in improving their sustainability performance.

4. Continuously monitored and reviewed our procurement practices to identify areas for improvement. We conduct regular audits and assessments of our procurement practices and supply chain to highlight any areas for improvement.

We recognize that sustainable procurement is an ongoing process and commit to regular evaluation of our policy and practices to ensure they remain aligned with international regulations, conventions, and best practices. We are committed to gathering feedback and input on our sustainable procurement performance and using this feedback from stakeholders in our continuous improvement efforts.
